**December Specials**

**Warm Air Blankets**

Our warm air blankets are a safe, economical solution. They are made of a silky polyester fabric with an inlay of nylon waterproof material to keep the airflow circulating towards just the patient. These blankets are machine washable (hang to dry), so much more economical than other disposable air blankets on the market. There is a 5" diameter round opening with a nylon cord to secure the blanket to any of the major brands of warm air convection units.

**Buster Anti-Lick Strips**

Wound designed to stop licking, biting, and chewing for dogs and cats

A special process imbeds disagreeable flavors that immediately discourages licking when smelled or tasted. One side of the strip is standard adhesive and the other is impregnated with:

- Cayenne paper
- Oregano
- Lemon powder
- Peppermint

Nontoxic

Two types: one for placing directly on to skin and the other for placement on to bandage materials.

Smell and taste deterrent for use around:

- Surgical wounds
- Lick granulomas
- Insect bites
- IV cannula
- Anxiety licking
- Obsessive or anti-social lick behavior

**J1260** Buster Anti-LickStrip Pro  Distr. $12.00  List $17.00

- 245cm dispenser roll that can be trimmed to desired length
- Place above, below or around a wound site

Application will last up to 5 days

Easy to apply in 3 simple steps:
1. Shave or trim
2. Degrease - alcohol wipe
3. Dry and apply

**J1260A** Buster Anti-LickStrip Pro C  Distr. $12.00  List $17.00

- 245cm dispensing roll
- A stronger medical grade adhesive for use over dressings or casts

Application will last up to 5 days.

Available mid-February
Congratulations to Norm Jorgensen on receiving the Distinguished Alumni Athletics Award from Colorado State University in October. Dr. Jorgensen received the award for 30 years of support for CSU athletics.

**Hemastop**

Hemastop became necessary in veterinary styptics when the first nail trim started bleeding. Use on bleeding nails, beaks, skin, or any external minor bleeding.

Hemastop is a combination of two proven styptic compounds:
- Ferric subsulfate powder - industry standard
- Petrolatum gel - used in the sport of boxing as a safe and pain free styptic for years

Both compounds are combined in a familiar 'Chapstick' type screw end dispenser with a protective cap.

Economy - one tube has a multitude of uses
Ingredients - soy wax, petrolatum, ferric sulfate, diatomite
Net weight - 4gm
Patent pending

**J1257**  3 tubes per pack  Dist. $15.00  List $21.00

Easy Flow
Combo Anesthesia Machine with an O2 Concentrator

Air is free, oxygen is not!

Self Contained Oxygen Supply:
- continuous supply of medical grade 90%-95% pure O2 from a 5 liter/min oxygen concentrator.
- reserve O2 supply from O2 ‘E’ tank
- toggle back and forth with the flip of a switch
- very quiet O2 production from room air
- O2 concentrator mounted on leg base of machine for portable and easy to move convenience.

Oxygen is expensive: The cost of oxygen continues to climb sharply including tank rental, delivery, and hazmat charges. Does your clinic know its oxygen costs every month?

Anesthesia Machine
- Performance for a high standard of care with economic initial investment.
- Ready to go with O2 regulators and system hoses.
- Adult and pediatric circuits with breathing bags.
- Convenient handle for transport
- 5 large locking caster wheels
- Works with all types of vaporizers.

Included with the J0559AC and J0558NAC:
a. Anesthesia machine (less vaporizer)
b. Single E-tank yoke
c. Regulator flow seal valve
d. Concentrator shelf
e. J0248F Anesthesia circuit
f. J0248G Anesthesia circuit.
The oxygen E-tank is not included.
The 744E concentrator is not included and must be purchased separately.

J0559AC Easy Flow Anesthesia Machine
with mounting base ‘E’ yoke and hoses. (does not include vaporizer and oxygen concentrator)
Dist $2,060  List $2,600

J0744E Easy Flow
5 liter/minute oxygen concentrator. 3 year limited warranty.
Dist $690  List $895

Length  17.1 in (43.5 cm)
Width   12.3 in (31.1 cm)
Height  17.0 in (43.2 cm)
Weight  29.6 lbs (13.4 kg)

J0558NAC JorVet Anesthesia Plus Machine
with mounting base ‘E’ yoke and hoses. More shelf space - not shown with hoses and ‘E’ yoke attached. (does not include vaporizer and oxygen concentrator)
Dist $2,254  List $2,825
New Products

Cage Caddy

It is important to keep a hospitalized patients’ personal items such as medications and collars close by and organized. The JorVet Cage Pet Caddy hangs securely from the patient’s cage door bars. It can be also readily moved to a new cage.

**J1152** Clear polycarbonate
- 3 1/2”h x 8 3/8” w x 3 1/4”d
- Two hooks back attach onto cage bars. Clear material allows easy visualization of contents.
- Sloped top allows any fluid to run down and off
- Virtually unbreakable polycarbonate
- Hinged top door
Dist $48.00  List $66.00

**J1152A** Blue plastic
- 3 1/16”h x 12 3/4” w x 4 1/16”d
- Slightly larger
- Less expensive
- Used in human hospitals
- Three compartments
Dist $10.00  List $14.80

Clear Dispensing Bins

These attractive storage bins are great for keeping high use items close at hand.
- Three different sizes
- Clear rigged polycarbonate: can easily see contents
- Lid has magnetic back so can stay open

Some suggested uses:
- Dispensing vials
- Sampling jars
- Blood tubes

**EN Snare®**
Endovascular Snare System
For the surgical treatment of the heartworm caval syndrome

The heartworm caval syndrome is a life-threatening manifestation of canine heartworm disease. A large number of adult heartworms in the great vessels in or around the heart led to severe pulmonary hypertension. The patient requires immediate surgery with the most common procedure being the tranvenous heartworm extraction.

The **EN Snare** endovascular system is intended for use in the jugular vein. It consists of three interlocking loops.

*The EN Snare is designed to expand to vessel wall size for retrieval of hard to get side-walled objects.*

The **EN Snare** is designed with three loops to increase the probability of foreign body capture.

*Interlaced Nitinol loops provide structural integrity when capturing objects.*

**Brix Refractometer**
This type of refractometer is useful in measuring the quality of colostrums.
Nail trimming is an everyday event and challenge at all veterinary clinics. Accidentally trimming the nail into the 'quick' with subsequent hemorrhage is a daily occurrence. Pigmented nails or long nails have a variable length of quick making bleeding even more likely. It is important to stop this hemorrhage quickly and painlessly to the benefit of the pet and their owner.
