SELECTING THE RIGHT MUZZLE FOR YOUR DOG:

1. Use a string to measure around your dog's nose at the position shown. (For basket muzzles use the string around the area half way between eyes & tip of nose. Add 2” for small/med dogs and 3” for large.)
2. Place your forefinger under the string to ensure enough space for your dog to be comfortable - don’t tighten the string; it should be free to move around the dog’s nose.
3. Lay the string along a ruler to get appropriate length, then select the proper muzzle.
   * The muzzle must not be tight. It’s better a little loose than too tight.

* These sizes fit dogs with shorter noses. Your dog may be unusually large or small for its breed. Use a larger or smaller size.
