qLabs® Data Manager
Installation Guide

1. Open the installation DVD and double click the “setup.exe” to launch setup.

2. The Welcome screen will appear as below. Click Next to enter the Customer Information window.

3. Input the customer information and click Next.
4. Click **Change** to change the installation path. When you finished specifying the path, click **OK** to complete the pop-up window. Click **Next** to enter the next screen.

![Specifying the installation path](image1.png)

5. Select **Complete** from the Setup Type screen and click **Next**.

![Select Complete](image2.png)
6. Click **Install** in the pop-up window and start the installation.

7. The progress bar will appear during the installation.

8. When you finished the installation, click **Finish** to close the pop-up window.
9. The USB Driver Installation window will pop up automatically after finishing the installation. If you need to install the Driver, select **Yes**. If the Driver has been installed, select **Cancel** to close the pop-up window and finish the installation.

10. Click on **Next** from the Driver Installation window to enter the next screen.

11. Select **I agree this agreement (A)** and click **Next**.
12. Once the installation is finished, the driver will be shown on the screen. Click **Finish** to close the pop-up box.
