---

**Patent Pending**

**J1202 EZ Tie pack of three**
Will work with most anesthesia masks!

Anesthesia mask

1) Secure looped end of EZ Tie over anesthesia circuit connector Fig 6 and then tighten Fig 7
2) Place body of tubing between 1st and 2nd clasps over behind ears. Fig 8 and Fig 9

General info: Tubing length can be trimmed to shorter length if desired.

Cleaning: clean between uses with warm soapy water or mild disinfectant

Do not autoclave

Warning: Always observe endotube or mask during surgery as inadvertent motion can occur. Dislodging tube or mask results in potential harm to patient.
